

LIPOVITE INJECTION INGREDIENTS

Methionine: It assists in the breakdown of fats and thereby prevents the build-up of fat in the arteries, as well as assisting with the digestive system and removing heavy metals from the body since it can be converted to cysteine, which is a precursor to glutathione, which is of prime importance in detoxifying the liver.

Inositol: Inositol plays an important part in the health of cell membranes especially the specialized cells in the brain, bone marrow, eyes and intestines. The function of the cell membranes is to regulate the contents of the cells, which makes effective functioning possible. Inositol is said to promote healthy hair, hair growth, and helps in controlling estrogen levels and may assist in preventing breast lumps. It may also be of benefit in reducing blood cholesterol levels.

L-lysine: Together with its fatty acids this supplement may help to burn calories, thus giving the body a necessary source of energy. Lysine as an amino acid may boost energy levels, promote weight loss process and supporting the digestive system.

Thiamine: supports healthy metabolic function. It also supports the eyes, kidneys, nervous system, and brain. Thiamine HCl aids memory and cognition and helps promote recovery after strenuous exercise.

Pyridoxine: may support heart function, promote brain health, fortify the joints, and help aid healthy sleep.

Riboflavin: (vitamin B2) works to support the eyes, cardiovascular function, and healthy mood. It supports healthy metabolic function and helps provide energy for the body.

Niacinamide: may support heart and cardiovascular health. It has anti-inflammatory properties and may help support the joints. Niacinamide may promote healthy skin, contribute to healthy mood, and assist in aiding healthy sleep.

Dexpanthenol: helps support heart and cardiovascular function, provides energy, and fortifies the joints. It also supports healthy brain function and promotes a healthy mood.

L-carnitine: is commonly used by bodybuilders as part of a pre-workout regimen to help boost energy and aid exercise recovery. It helps support heart health and brain function and may aid in maintaining healthy glucose levels and weight in already healthy individuals when taken in conjunction with a healthy diet and exercise.

Hydroxocobalamin: is a man-made injectable form of [vitamin B12](#) used to treat low levels (deficiency) of this vitamin. [Vitamin B12](#) helps your body use [fat](#) and carbohydrates for energy and make new protein. It is also important for normal [blood](#), cells, and nerves. Most people get enough vitamin B12 in their diet, but a deficiency may occur in certain health conditions (such as poor [nutrition](#), [stomach/intestinal](#) problems, infection, [cancer](#)). Serious [vitamin B12 deficiency](#) may result in [anemia](#), [stomach problems](#), and [nerve damage](#).
